I just left the site. Its a torrential downpour at the moment. Gonna get some dry clothes on, catch up on emails, and assemble some clips to share. My 2 Wheeling co-workers are still at the site. Afternoon update call was cancelled. There will be another press at the gov's office around 9pm.

Hi Linda,

After looking at the products listed on the Status Report from Freedom Industries there is no product that would be considered an oil so it would not be regulated under the SPCC regulations. Let me know if you need any additional information
